

Installing Citrix on your home Windows 7 computer

First open a browser to access the Internet. Type in ***citrix.sjrwmd.com*** in the address window and hit enter.

You should end up here.

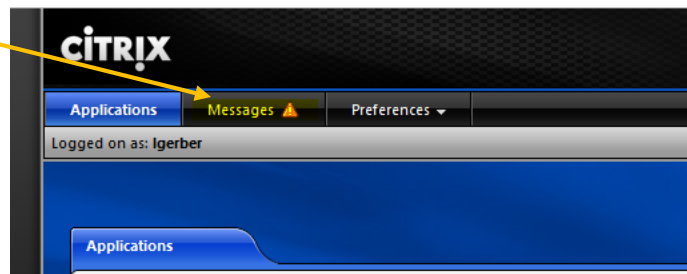

Log in using your SJRWMD user credentials.

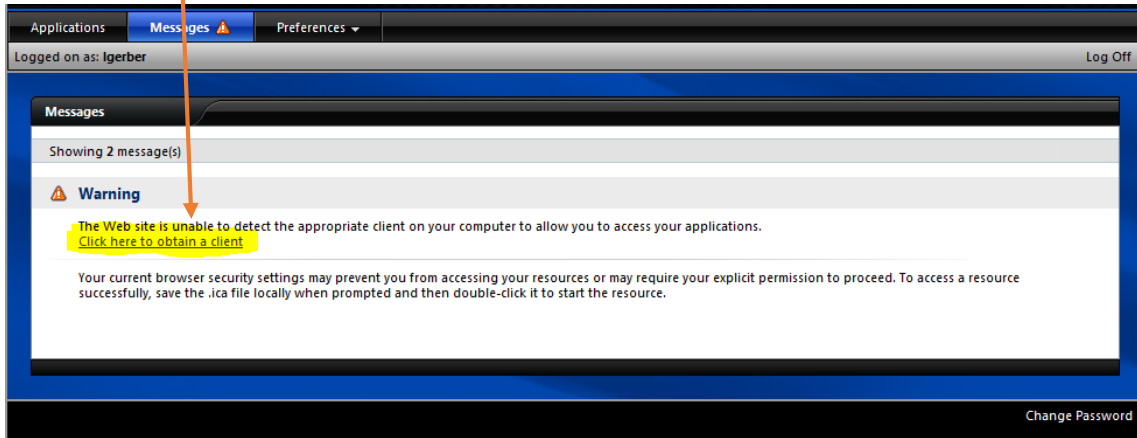

Now that you are logged in you will see three tabs at the top: Applications, Message and Preferences.

Select Messages

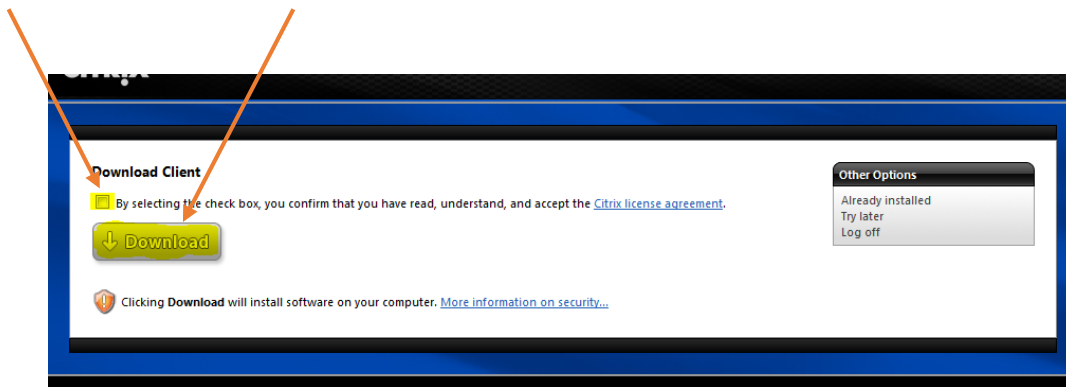

Installing Citrix on your home Windows 7 computer

Under the Message tab you will see a Warning – This is where you will see the notice to install the client
Click the link “click here to obtain a client.”

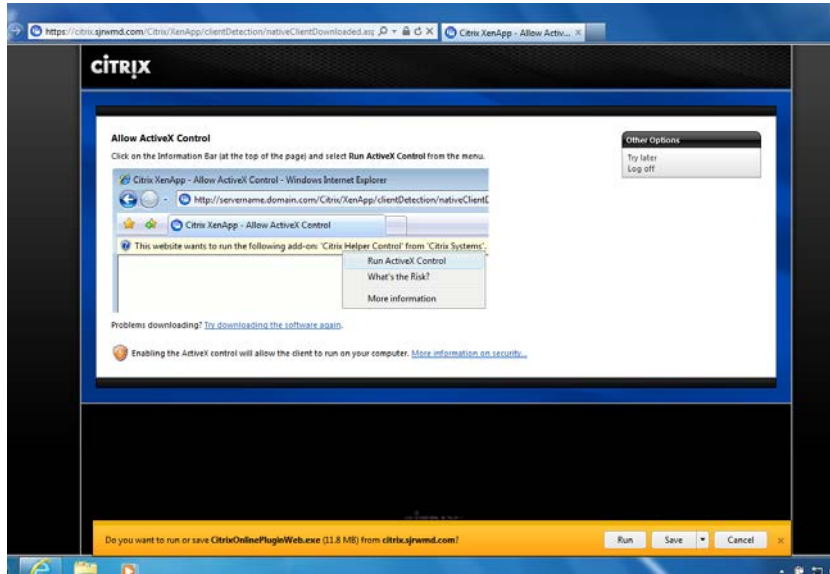

Select the box then click the download button.

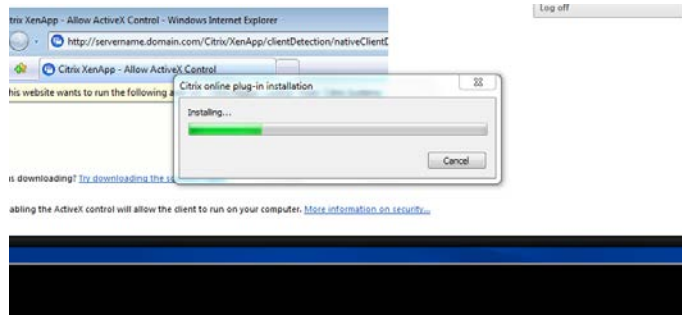

Follow the instructions on screen – Select RUN to run the installation.

Installing Citrix on your home Windows 7 computer

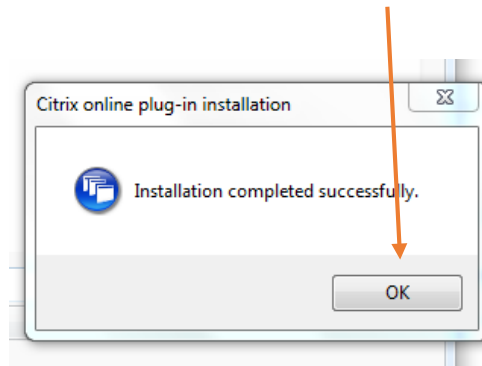

Installing Citrix on your home Windows 7 computer

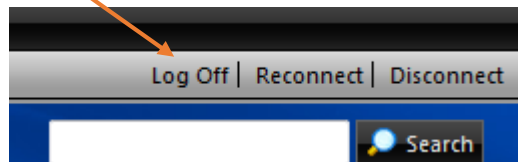

The installation will progress.

When the installation is complete you will see this notification. Click OK.

You will need to log out of Citrix.

Then you can log back in and access the applications that you need.
